

# FEVE's container glass production recovered from 2020's decline and increased to its highest level recorded

## Production in 2021 increased 5.0% in 2021, similar to EU's economic growth (5.4%)

- FEVE's production in 2021 recorded its maximum level since 2012
- Production increased by 5.0% and 3.0% in 2021 in weight and units, equivalent to 1,127 thousand tons and 2,423 million units, respectively
- Production in 2021 was 10.1% and 7.8% larger than 2016 levels in tonnage and unit terms, respectively

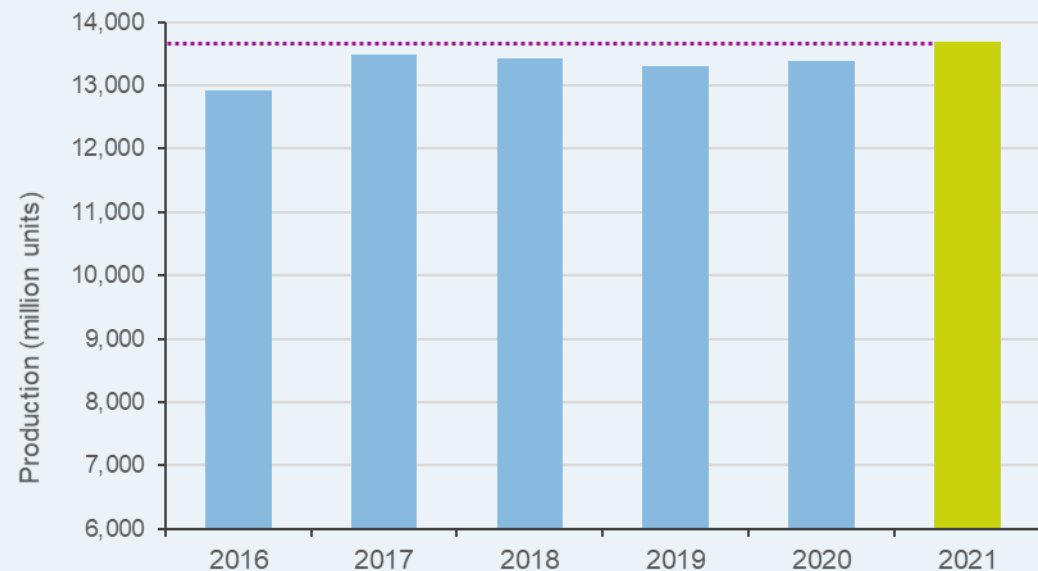

| Year | Tonnage (1000 tonnes) | Tonnage annual change (%) | Units (millions) | Units annual change (%) |
|------|-----------------------|---------------------------|------------------|-------------------------|
| 2016 | 21,298                | 5.3%                      | 77,291           | 4.6%                    |
| 2017 | 21,879                | 2.7%                      | 79,603           | 3.0%                    |
| 2018 | 22,101                | 1.0%                      | 79,669           | 0.1%                    |
| 2019 | 22,818                | 3.2%                      | 81,796           | 2.7%                    |
| 2020 | 22,331                | -2.1%                     | 80,872           | -1.1%                   |
| 2021 | 23,458                | 5.0%                      | 83,295           | 3.0%                    |

# Total production increased in 2021 to reach its highest level recorded

## Flaconnage production had a strong recovery in 2021, outgrowing 2020 levels by 2.2%

- FEVE’s flaconnage production in 2021 increased by 297.1 million units\*, to reach 13,692.1 million units by the end of 2021
- Production in 2021 was 2.4% greater than the 2016-2021 average

| Year  | Units (millions) | Units annual change (%) | Units annual change (absolute) |
|-------|------------------|-------------------------|--------------------------------|
| 2016  | 12,923.7         | N/A                     | N/A                            |
| 2017  | 13,488.8         | 4.4                     | 565.1                          |
| 2018  | 13,428.2         | -0.4%                   | -60.6                          |
| 2019  | 13,301.5         | -0.9%                   | -126.6                         |
| 2020* | 13,394.9         | 0.7%                    | 93.4                           |
| 2021  | <b>13,692.1</b>  | <b>2.2%</b>             | <b>297.1</b>                   |

\* Historical figures were revised and 2020 production levels slightly increased from the year before.
